In the original paper two regrettable errors occurred.

The caption of Figure 1 should correctly read: “Geological sketch map of the southwestern part of the Schober Group showing the location of the travertine deposit near Ainet (compiled and simplified after Linner 1994, 1995b, 2005, and Reitner, 2003).

On page 88 the sentence “The faults present in the immediate vicinity of Ainet are related to the Isel fault (Linner, 2005), but there is no clear relationship between these faults and the location of the travertine deposit.” should read “The faults present in the immediate vicinity of Ainet are related to the Isel fault, but there is no clear relationship between these faults and the location of the travertine deposit (Linner, 2005).”
